

PROJECT VALOUR-IT

Voice-Activated Laptops for OUR Injured Troops

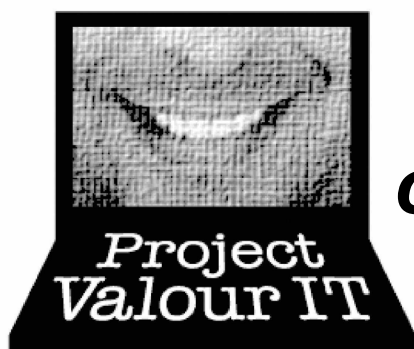

In memory of SFC William Ziegenfuss

**Imagine the *tremendous* positive impact
of communication & support on
a wounded soldier's spirit and health!**

Soldiers Angels Project Valour-IT provides voice-controlled and adaptive laptop computers to wounded soldiers recovering from hand wounds and other severe injuries. Operating laptops by speaking into a microphone or using other adaptive technologies, they can send and receive messages from friends and loved ones, surf the 'net, and communicate with buddies still in the field.

Delivering over 1500 laptops so far, Valour-IT helps the wounded reclaim a bit of wholeness and independence in the face of life-altering injuries, repeated surgery, painful physical therapy, and the isolation of the hospital room. At a cost of \$500, each high-quality laptop helps reconnect a soldier and reestablish personal dignity.

All funds will go directly to **Project Valour-IT** to purchase and ship the laptop that will provide independence and freedom to wounded Soldiers, Sailors, Airmen, and Marines.

***The power of
communication
to heal.***
